

We place a lot of weight on your accuracy.

MAIER SWISS

Maier machine bases are 8,500 lbs. of solid polymer concrete.

Maier's innovative Swiss turning centers are a lot heavier than other lathes for a big reason. Accuracy.

It starts with the foundation. An impressive, 8,500 lb. base made of solid polymer concrete that eliminates the enemy—vibration. The results are a consistent, industry-leading accuracy of 0.0001", deeper cuts in exotic materials, better surface finishes and more. Plus, Maier machines are loaded with versatile, modular features and multiple tool /axes capabilities to address your applications.

Learn how you can profit from Maier technology and see why Maier machines are turning the industry on its side.
